Hi All,

Could anyone pelase help me in knowing the steps open a SAP GUI in a web browser. (HTML)

Step by step procedure would be of great help.

Thanks,

Vljaya

Check if you have activated:

2

1) With transaction SICF and locate the services by path

/sap/public/bc/its/mimes

/sap/bc/gui/sap/its/webgui

2) With Transaction SE80 locate from the menu, Utilities u2013> Settingsu2013>Internet Transaction Server (Tab)u2013>Publish (Tab) and set u2013On Selected

Siteu2013 = INTERNAL.

This restricts the publication in the next step to the integrated (internal) ITS.

3) In SE80 only, Locate the Internet Services: SYSTEM and WEBGUI.

Publish these services with the Context Menu -> Publish -> Complete Service

4) Now Browse to <http://<server>:<icmport>/sap/bc/gui/sap/its/webgui/>! and login to the webgui.

Thanks,

Prasant

For example WEBGUI is a service and you can find it in SICF under

/sap/bc/gui/sap/its/webgui

Check if it is activated. If not it is gray. In this case activate it.

After doing so right click on WEBGUI and execute "Test service".

A browser window should be opened.
